Hair Straightening [X-tenso] ₹ 6500
onwards

This treatment transforms rebellious, curly, or frizzy hair to smooth, beautifully silky and shiny hair. This is a milder way of straightening as opposed to the pin straight rebonding. The result of the X-tenso is natural and makes the hair look smoother and softer to touch. The natural volume and the movement remains intact, making the hair smooth and at the same time not making it look too flat.

The Permanent Blow-dry [Cysteine] ₹ 6500
onwards

This treatment is from BRAZIL but it is **not a keratin treatment**. Instead the treatment uses a naturally occurring essential amino acid called 'Cysteine' to straighten the hair, making it a safer treatment than the formaldehyde based keratin treatment. Cysteine is more naturally absorbent, eliminating the need for formaldehyde coating to seal the product in. As a result this treatment contains no complicated chemical formulas that the keratin treatment needs. It's a semi-permanent treatment that lasts about four months. This treatment is so safe that children above the age of 12 as well as pregnant women can use it!
